

Effect of surfactant on the efficacy of imazapyr*

No significant difference between treatments

* 6 pt/ac, 10 gpa, >6 hrs dry time

Spartina control with imazapyr as a function of surfactant

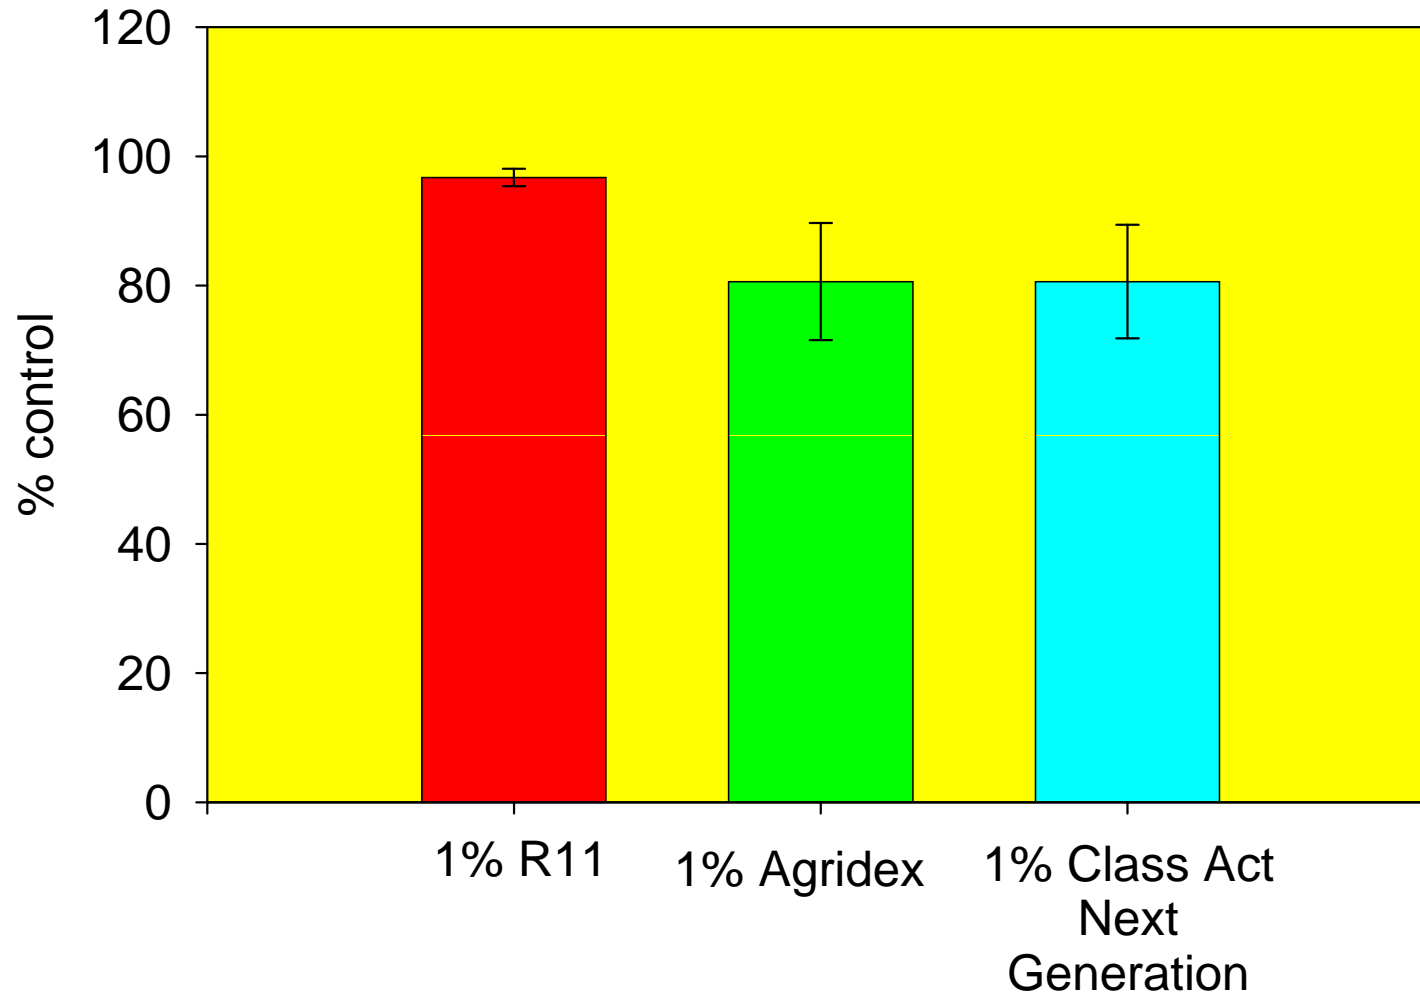

6 pt/ac, 20 gpa spray volume on spartina meadow with 4 hours dry time (surfactant @ 1 qt/ac)

Rodeo applied @ 7.5 qt/ac using 1% v/v (0.4 qt/ac) surfactant @ 10 gpa on 8/8/00 @ anthesis, Tarlett slough, 8hrs dry time

Spartina control with Aquamaster as a function of surfactant

5% spray to wet, 10-3-03, mixture of young clones and meadows
>6 hours dry time

Efficacy as a function of Surfactant & Rate

Rodeo @ 2 gallons/ac applied at 10 gpa spray volume
